

Alphabetical Listing of ATC drugs & codes.

Introduction

This file is an alphabetical listing of ATC codes as supplied to us in November 1999. It is supplied free as a service to those who care about good medicine use by mSupply support.

To get an overview of the ATC system, use the "ATC categories.pdf" document also available from www.msupply.org.nz

Thanks to the WHO collaborating centre for Drug Statistics & Methodology, Norway, for supplying the raw data.

I have intentionally supplied these files as PDFs so that they are not quite so easily manipulated and redistributed. I am told there is no copyright on the files, but it still seems polite to ask before using other people's work, so please contact <whocc@nmd.no> for permission before asking us for text files.

mSupply support also distributes *mSupply* software for inventory control, which has an inbuilt system for reporting on medicine usage using the ATC system

You can download a full working version from www.msupply.org.nz
