

Updating Currency rates

Choose Special > Currencies

As of version 3 mSupply allows automatic update of currencies from internet rates

Click the **Refresh Rates** button to update the Internet rates

To update the stored rates to match internet rates, highlight the lines to update (hold down **control** (Win) or **command** (Mac) to select multiple lines, or press **control + A** (Win) or **command + A** (Mac) to select all currencies), then click the **Apply rate(s)** button. Rates are kindly provided by Yahoo currency services. Please don't abuse the service by clicking the update button all the time.

Click the "Rates provided by Yahoo" link at the bottom of the window to be taken to Yahoo's currency site.

Note that any Supplier quotes that use the same currency rate will be updated when the currency's rate changes
